A TWO-DAY COURSE BY PROFESSOR MALCOLM BOLTON

A FRESH PERSPECTIVE ON SOIL MECHANICS WITH APPLICATION TO GEOTECHNICAL DESIGN

Thursday and Friday, May 22 & 23, 2014

INSTRUCTOR:

Professor Malcolm Bolton FEng, Cambridge University, UK

Malcolm Bolton graduated from Cambridge University in 1967 and took an MSc in structural engineering from Manchester University. From 1969 he helped Andrew Schofield to set up the UK's first geotechnical centrifuge facility in Manchester, continuing there as a lecturer and publishing his textbook "A Guide to Soil Mechanics" in 1979. He returned to Cambridge in 1980, where he was awarded a PhD in soil mechanics, and later became Professor of Soil Mechanics. He was the Director of the Schofield Centre from 1995 until he retired in 2013. He has published over 230 papers, working with 45 doctoral candidates, 15 of whom have studied fundamental soil mechanics, with 30 using physical models to investigate a great variety of geotechnical applications. Professor Bolton holds various awards from the UK Institutions of Civil Engineers and Structural Engineers, and the Canadian Geotechnical Society, and he is a Fellow of the Royal Academy of Engineering. He gave the 2012 Rankine Lecture, "Performance-based design in geotechnical engineering".
